

Week	Lecture	Lab/Seminar/Tutorial
1.	What's AI	Introduction to R and R Studio
2.	Intelligent Agents	Introduction to Python / Programming Agents with Python
3.	An Introduction to Machine Learning	Python basics / Working with NumPy and Pandas in Python / Programming Agents with Python
4.	LLMs	Working with LLMs
5.	Reinforcement Learning	Reinforcement Learning with R / Reinforcement Learning with Python
6.	Reinforcement Learning – Implementation & Project Ideas	Reinforcement Learning – Projects examples – ICA examples
7.	Uninformed Search I	Uninformed Searching Algorithms - Implementation with R and Python (BFS, DFS, DLS)
8.	Uninformed Search II	Uninformed Searching Algorithms - Implementation with R and Python (IDDFS, BS, UCS) ICA Progress & Feedback
9.	Informed Search	Informed Search Strategies – Implementation with R and Python (Greedy, A*, Dijkstra)
10.	Uninformed and Informed Search – Applications	Uninformed and Informed Search – Applications – ICA examples
11.	Guest Lecture	ICA Support / Students' Presentation
12.	Assessment/Consolidation	ICA Support / Students' Presentation
